01 / PRODUCT OVERVIEW · 产品概览

FROM BRIEF TO ACTION / 从简报到行动

GlobalLaunch AI turns a brand brief into a provisional 30-day market-validation plan for overseas expansion. New observations can inform controlled AI revisions that users review before saving. Its outputs are planning drafts, not verified research.

GlobalLaunch AI 将品牌简报转化为面向海外市场的30天验证型营销计划。新增观察和反馈可推动受控的 AI 策略修订，由用户审阅后保存。其输出属于规划草稿，而非经核实的市场研究。

01
Marketing strategy & positioning
市场策略与品牌定位

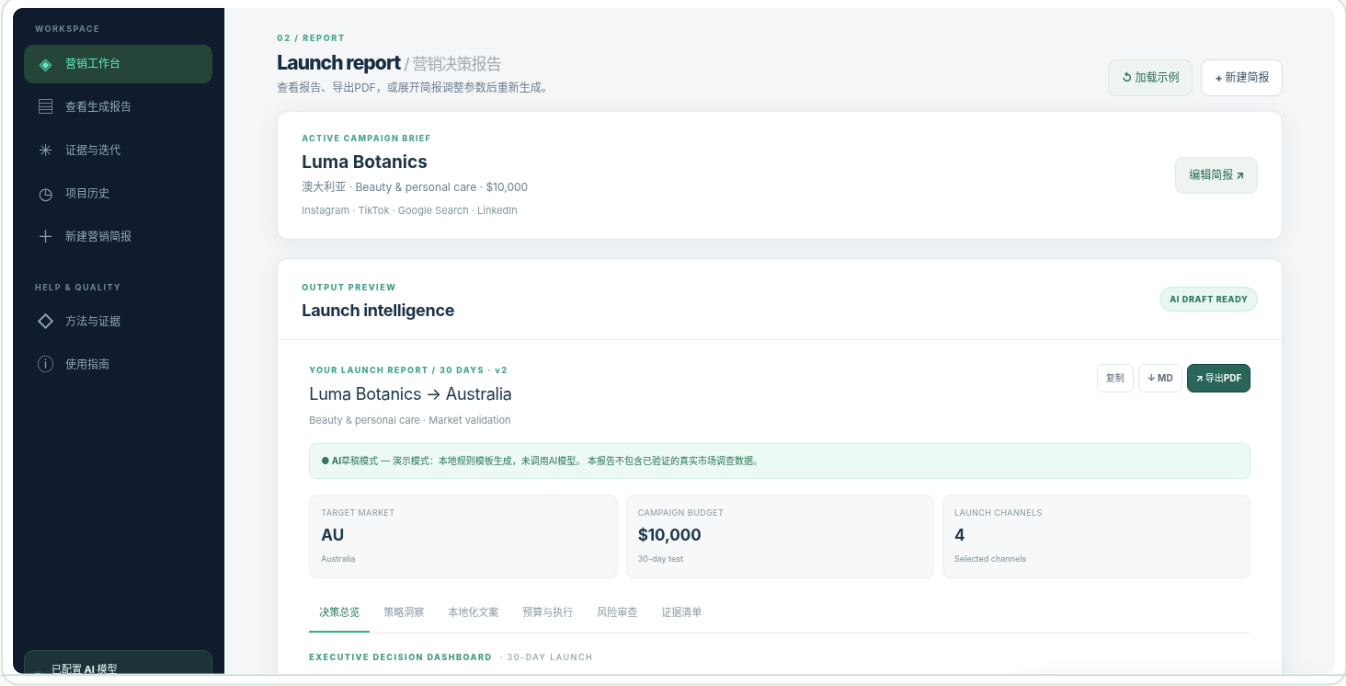

02
Localized creative & campaign plan
本地化创意与30天执行计划

03
Evidence-led revisions & version history
证据驱动修订与历史版本管理

04
Decision dashboard & PDF output
营销决策仪表盘与 PDF 导出

PRODUCT INTERFACE / 产品界面

Fictional brand demonstration · 虚构品牌演示

From new information to a better plan.
让新信息推动策略更新。

AI proposes changes; the reviewer decides what becomes a new version.
AI 提出修改建议，是否成为正式新版本由用户决定。

REVISION WORKFLOW / 修订工作流

01	02	03	04	05
Generate v1	**Add evidence**	**Select scope**	**Review diff**	**Save v2**
生成初版	补充信息	限定章节	对比改动	保存新版本
Initial strategy draft	Text + source / date	Choose editable sections	Accept or reject	Keep history

ILLUSTRATIVE SCENARIO ONLY / 仅作功能示例，非真实访谈结果

Initial hypothesis: Consumers may favor a simple skincare routine. **Hypothetical new input:** 8 of 12 fictional interviewees prefer clearer ingredient information. **Proposed revision:** Update messaging experiments, flag the tiny sample, and preserve the approved campaign budget and channels.

初始假设：消费者可能偏好简单的护肤步骤。**虚构后续信息：**12名假设访谈对象中有8人更关注成分信息。**修订方向：**调整广告测试角度，注明样本量很小，并保持既定预算及渠道不变。

BUILT-IN SAFEGUARDS / 内置控制

Section-level control / 按章节修订
Unselected sections are restored from the previous report.
未获准修改的章节沿用原版本内容。

Budget & channel integrity / 预算及渠道约束
Total budget and selected channels remain anchored to the brief.
预算总额与选定渠道依据原始简报受到约束。

Review before adoption / 人工审核后采用
A suggested revision is not automatically saved as the next version.
AI 修订草案不会自动成为已保存版本。

Source awareness / 来源意识
User-provided material remains unverified unless checked separately.
用户提供的材料须独立核实，不能自动视为事实。

Current input scope / 当前输入范围
Manual text entry for interview notes, observed results, research notes and new ideas. File uploads, live ad-platform data imports and independent source verification are **not implemented**.
目前支持手工录入访谈摘要、观察结果、研究笔记和新想法；**尚不支持**上传资料文件、自动导入广告平台数据或独立核验外部来源。

TRY IT IN 90 SECONDS / 90秒体验路径

1 · Load a sample / 加载示例
Start with a fictional brand brief.
从虚构品牌简报开始。

2 · Generate a report / 生成报告
View strategy, budget and risks.
查看策略、预算与风险。

3 · Revise & export / 修订与导出
Add a hypothetical note; compare versions and save PDF.
添加模拟观察，对比版本并导出PDF。

Free-hosting instances can take about a minute to wake after inactivity. / 免费实例休眠后首次加载可能需要约一分钟。

Designed for accountable iteration.
以可追溯的迭代支持决策。

HOW IT WORKS / 技术架构

FRONTEND / 前端

HTML • CSS • JavaScript

Brief, dashboards, version comparison
简报、仪表盘、版本对比

SERVER + AI / 服务端

Node.js • DeepSeek API

Structured generation & revision guardrails
结构化生成与修订约束

DELIVERY / 交付

Render HTTPS • PDF • JSON

Online demo, browser-local history
在线体验，浏览器本地历史

What has been checked / 已完成的检查

Public deployment and export / 公网与导出

Render deployment shows Live; a seven-page report was exported from the public URL.
Render 显示 Live；已从公网地址导出七页报告。

API-enabled generation / API 生成

Server-side DeepSeek integration is implemented; user-observed AI report generation was successful.
已实现服务端 DeepSeek 接入；用户实际测试中成功生成 AI 报告。

Automated tests / 自动化测试

30/30 source tests passed locally, including mocked provider calls and revision safeguards. This is not a production performance test.
本地源码 30/30 项测试通过，包含模拟模型调用与修订约束；不等于正式生产环境压力测试。

Limits & responsibilities / 边界与责任

Planning ≠ field research / 规划不等于实证调研

No independently verified market statistics, compliance certification or real-world ROI claims are supplied.
不提供独立核实的市场统计、合规认证或真实 ROI 结论。

Revision verification / 修订验证范围

Revision and version UI tested with simulated API responses; real-model revision is not independently confirmed here.
修订与版本界面经过模拟接口测试；尚未在本材料中独立验证真实模型修订全过程。

Data & access / 数据及访问

History is saved in each browser, not a cloud account. Inputs sent for live AI generation reach the model provider; avoid sensitive data. API limits are not hard spending caps.
历史储存于各自浏览器，不是云账号；实时输入会发送至模型提供方，请勿提交敏感资料。调用限制不是绝对费用上限。

Project role & development approach / 项目角色与开发方式

David Xie: Commercial problem framing, product requirements, workflow direction, iterative review and hands-on deployment. Implementation used AI-assisted coding; test results and limitations are reported explicitly. No independent client adoption is claimed.

David Xie： 负责商业问题定义、产品需求、流程方向、迭代评审与实际部署；使用 AI 辅助编程完成原型实现，并如实说明测试结果与能力边界。不宣称已有独立客户采纳成果。
